177 of Vasco da Gama and Albuquerque, is one of those coins
301 which, having found favour with a people, is used persistently in ornamentation long after it has passed out of currency. So fond are the Malayālis of the sequin that to this day there is quite a large trade in imitations of the coin for purposes of ornament. Such is the persistence of its use that the trade extends to brass and even copper imitation of the sequins. The former are often seen to
[554] bear the legend 'Made in Austria.' The Nāyars wear none but the gold sequins. The brass imitations are worn by the women of the inferior races. If one asks the ordinary Malayāli, say a Nāyar, what persons are represented on the sequin, one gets for answer that they are Rāma and Sīta; between them a cocoanut tree."

301 789 [777] [325] In connection with the wearing of charms by Nāyars Mr. Fawcett writes as follows. "One individual (a Kiriattil Nāyar) wore two rings made of an amalgamation of gold and copper, called tambāk, on the ring finger of the right hand for good luck. Tambāk rings are lucky rings. It is a good thing to wash the face with the hand, on which is a tambāk ring. Another wore two rings of the pattern called trilōham (lit. metals) on the ring finger of each hand. Each of these was made during an eclipse.
301 789 782 [304] Yet another wore a silver ring as a vow, which was to be given up at the next festival at Kottiūr, a famous festival in North Malabar. The right nostril of a Sūdra Nāyar was slit vertically as if for the insertion of a jewel. His mother miscarried in her first pregnancy, so, according to custom, he, the child of her second pregnancy, had his nose slit. Another wore a silver bangle. He had a wound in his arm which was long in healing, so he made a vow to the god at Tirupati (in the North Arcot district), that, if his arm was healed, he would give up the bangle at the Tirupati temple. He intended to send the bangle there by a messenger.

323 would be better paid. Some of these potters are employed by tile works producing pottery and glazed earthenware and are there paid Rs. 10 or so a month.

322 *Carpenters.*—There are five families of carpenters. There is steady demand for their labour, which is well paid. The occupation is hereditary and confined to the caste of 'Asaris', as they are called, a division of the Thiyyas. Full time is spent on the craft, which follows very old traditions. Earnings average about 6 annas a day. The carpenters go out to other villages for work.

326 *Goldsmiths, blacksmiths.*—Two or three families of each combine their traditionary crafts with agriculture, and are better off than most other low caste families. In the agricultural seasons they work morning and evening in the fields; and only at noon at their crafts. So they earn wages in money and in kind. The goldsmith earns Rs. 8 to Rs. 10 in this way per month; the blacksmith Rs 5 to Rs. 10.

325 *Moulders.*—There is one family making vessels of bell-metal for all sorts of uses—domestic utensils, temple bells, etc. They are very skilled workers and well paid, owing to the great demand for their productions. Some cups, bowls, etc., made by these are very beautiful and exquisitely designed and polished. Earnings Rs. 10 to Rs. 15 per month, according to state of business.

285 *Basket-makers.*—Baskets, mats, etc., are made out of the bamboo by the Parials. Very useful, but cheap. Only a local market and mostly made to order, as most business is in the village. Only spare time is spent in this occupation; it is miserably ill paid owing to weakness in bargaining. There is scope for development.

293 *Umbrella makers.*—Umbrella making is the hereditary occupation of the Panans. The umbrellas are made of palm leaves and bamboo, and much used in the village. Until recently imported umbrellas were not seen. The indigenous article costs only a few coppers and gives better protection against rain, but is unwieldy. The earnings of the Panans from this source are very low, and they are now taking to agricultural labour.

[262] *The Chettis* make what are called *Pappatams*—the thin cakes to be fried in oil, for which Malabar is famous. The Chettis are also cartmen and take goods and passengers to neighbouring

[276] places. The *Paravans* make slaked lime for chewing. About half the adults chew a mixture of betel, areca, and slaked lime.

438 *Village trade.*—The village buys every year agricultural implements such as ploughs, spades, levelling boards, harrows, *kuzhi kutti*. Most of these are made to order by the village craftsmen. Some are bought at neighbouring fairs. Seed is usually preserved by the cultivator out of his produce, but sometimes he is forced by poverty to consume it and then borrows it or buys it with borrowed money. Live stock is bought at the weekly fair of the neighbouring village of Vaniamkulam.

The villagers buy the articles of ordinary consumption like salt, sugar, kerosene oil, gingelly and coconut oil, as well as the various grains and pulses at the village shop. Sugar is a luxury to all but the richest villagers. More than Rs. 600 worth of toddy is sold in the village, the Cherumas, Pariahs and Panans being the chief consumers. They pay in paddy, out of their wages. Clothing is bought at neighbouring fairs or in the nearest trading centre.
